

# Pranav Jagtap

pranavjagtap7007@gmail.com | +91 9766537007 | Pune, Maharashtra

## EDUCATION

### DR. BATU, LONERE

#### B.TECH IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023 | Raigad, India

CGPA: 8.4 / 10

Detailed CV:// [pranavjcv](#)

## SKILLS

### LANGUAGES

C# • Python • SQL • JavaScript

TypeScript

### BACKEND FRAMEWORKS

.NET Core (Web API & MVC)

FastAPI • Flask

CrewAI • LangChain

### AI / GENAI

OpenAI, Gemini LLMs (fine-tuning)

Prompt Engineering

RAG Pipelines

pgvector • Chroma

LangSmith / Langfuse

### DATABASES

PostgreSQL • SQL Server

Redis • Aerospike

MySQL • MongoDB

### CLOUD & DEVOPS

GitHub Actions • Azure DevOps

Azure App Services • App Service Plan

Azure Key Vault • App Insights

Azure Service Bus • Static Web App

Docker • Kafka

### INTEGRATIONS

Stripe • Stytle

Amazon SP-API • Keepa

MessageBird • Hotjar

### FRONTEND

React • NextJS

HTML • CSS • JavaScript

WXT • MaterialUI

## SUMMARY

Full-Stack AI Engineer with **3 years** of experience delivering scalable backend systems & GenAI applications using **.NET Core, React, FastAPI** with AI Integrations (OpenAI, Gemini, OpenRouter LLMs). Proven ownership of features end-to-end from prototype to production, across monolith/microservice architecture. Passionate about process optimizations & currently collaborating on architectural decisions at a startup scale.

## EXPERIENCE

### AVALPHA TECHNOLOGIES | FULL STACK DEVELOPER

Nov 2025 - Present | Pune, India (Remote)

- Architected microservices-based backend systems, owning API design and service communication end-to-end; optimised **25+** legacy endpoints and built v2 APIs, cutting average response times by **50%**.
- Reduced database storage by **35%** through PostgreSQL optimisation (indexing, query refactoring, reducing DB trips, data archival).
- Designed and shipped a **wholesale Amazon product search service** (POC to pay-as-you-go production feature); fine-tuned an OpenAI model with adjusted sampling parameters and context prompts for accurate product matching via SP-API and Keepa.
- Implemented **multi-marketplace support** (US, UK, Germany, Canada) with dynamic currency handling and a **factory-pattern profit & tax calculation module** per country/region.
- Implemented **Stripe-based subscription billing** end-to-end: monthly/yearly plans, feature-gated access control, webhook-driven lifecycle handling (upgrades, cancellations, failed payments) with idempotency and a reconciliation job as a safety net for missed webhook events.
- Integrated Stripe (payments), Stytle (auth), MessageBird (messaging), Amazon SP-API, and Keepa to power core product capabilities.
- Built and maintained CI/CD pipelines via GitHub Actions and Azure DevOps with PR validation workflows; managed production on Azure (App Services, PostgreSQL, Key Vault, Application Insights, Service Bus)

### PRISMATIC SOFTWARES PVT. LTD. | SOFTWARE ENGINEER

Sept 2023 - Oct 2025 | Pune, India

- Built and maintained scalable backend systems for AI-driven and enterprise applications using **.NET Core (C#)** and **FastAPI (Python)**, supporting production workloads across multiple domains.
- Implemented GenAI features: LLM integrations, multi-agent document processors, prompt orchestration, and **RAG pipelines** using pgvector and Chroma vector databases.
- Developed RESTful APIs with JWT authentication, RBAC, and audit logging; applied Repository & Dependency Injection patterns following N-tier architecture for clean, maintainable code.
- Optimised critical backend workflows and services, reducing processing latency by up to **40%**; built async background jobs for long-running tasks and system monitoring.
- Developed a **C# wrapper for PLC communication** and backend integrations for industrial/enterprise hardware interfaces, ensuring reliability in production.
- Containerised applications with Docker; contributed to event-driven architecture using Kafka for CDC workflows.
- Designed and managed relational databases (PostgreSQL, SQL Server, MySQL), including schema design, complex queries, and stored procedures for efficient data aggregation.
